

Pressure ulcers can strike a multitude of targets...

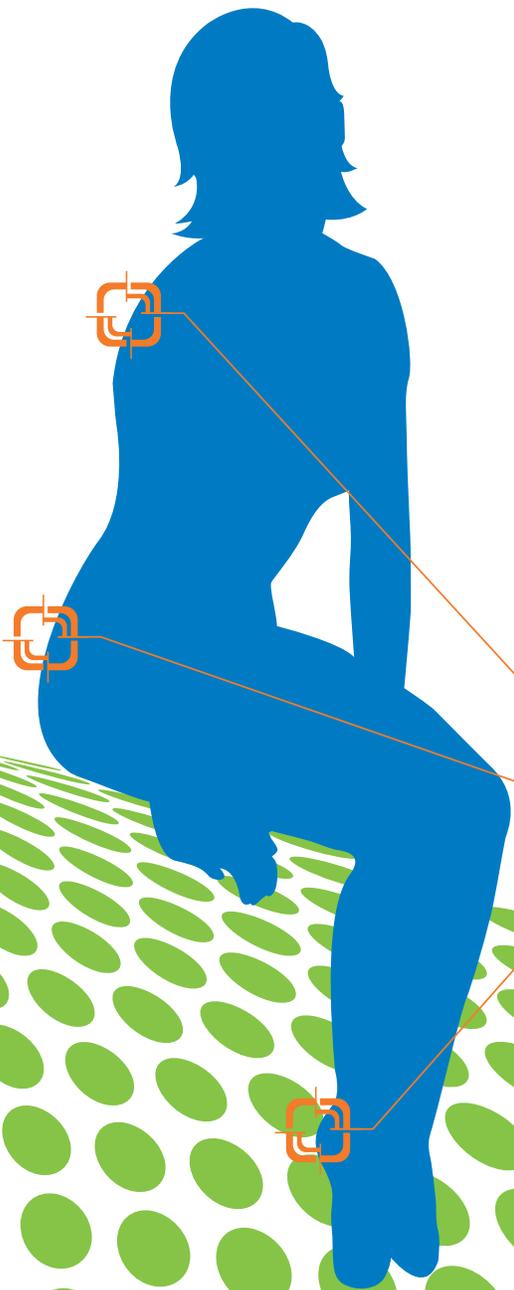

Introducing

A new defense

designed to prevent pressure ulcers across every zone

Advanced, innovative engineering and a revolutionary mattress design provide superior protection from head to heel

- **A new foam**—the first 3rd-generation polyurethane foam, proven to provide superior temperature and moisture management
- **A new process**—Variable Pressure Foaming (VPFSM) allows for greater manipulation of the foam to suit a wide variety of industrial and commercial needs
- **A new technology**—patented Surface Modification Technology (SMTSM) across the key mattress zones protects the most vulnerable areas of the body: the head, shoulders, elbows, sacrum, hips, and heels
- **A new portfolio**—with 6 BodyZoneTM SKUs from stretcher to bariatric

INTRODUCING NEW

bodyzoneTM

Mattress Replacement System

Put your patients in the safety zone

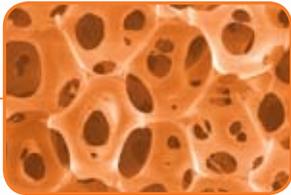

To offer the ultimate in pressure ulcer prevention...

The most advanced medical mattress technology available

Superior temperature and moisture management made possible by 3rd-generation visco¹

- Revolutionary 3rd-generation viscoelastic memory foam—made from all-natural material
- Wide-open cell design—more permeable than previous generations
- Improved breathability—delivers superior heat dissipation, moisture wicking

The wide-open cell design of the new 3rd-generation memory foam was proven to dissipate a significantly greater amount of heat than previous generations.¹

Customized foam for medical use made possible by Variable Pressure Foaming (VPFSM)

- A technologically superior manufacturing system that allows for greater manipulation of the foam to suit a wide variety of industrial and commercial needs
- The most environmentally friendly polyurethane foam-making process available—virtually emissions free
- A patented and enclosed system that exceeds the requirements of the Clean Air Act

VPFSM set the standard in environmentally responsible foam manufacturing.

...we reengineered everything.

Multi-zone pressure redistribution made possible by Surface Modification Technology (SMTSM)

- Patented SMTSM allows for varying features and properties to be incorporated within a single piece of foam, eg, surface alterations in pattern, size of pattern, spacing between patterns, and depth of cut
- Zones of firm support are alternated with zones of envelopment to enhance pressure-redistribution performance by 25% to 40%, depending on the SKU¹
- Maximizes comfort without compromising support and enhances air circulation

SMTSM is incorporated across key mattress zones to protect the most vulnerable areas of the body: the head, shoulders, elbows, sacrum, hips, and heels.

In lab testing vs. leading mattresses, BodyZoneTM consistently yielded the highest area of envelopment (distribution of pressure across the mattress).¹

Minimal shear and friction made possible by the 360° Stretch Cover

- A dynamic, flexible mattress fabric that moves in every direction to minimize the forces of shear and friction when patients are moved, lifted, or turned
- Cover features antimicrobial treatment and is impervious to fluids

bodyzoneTM

Mattress Replacement System

Put your patients in the safety zone

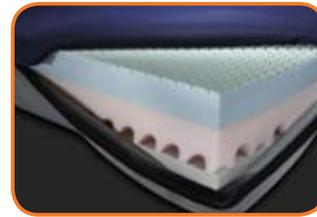

Innovative foam mattress technology

takes pressure ulcer prevention to the next level

Only BodyZone™ can offer you...

- Outstanding pressure redistribution
- The first green medical mattress replacement system
- Excellent friction and shear reduction
- Superior temperature and moisture management
- A line of medical mattresses lab-tested for performance and durability
- A broad network of North American-based manufacturing operations
- Commitment from the industry's leader in innovation, Foamex

Cross-section view of the ultimate in mattress performance: BodyZone™ 700.

A COMPLETE PORTFOLIO OF PRESSURE REDISTRIBUTION MATTRESSES

In BodyZone™ 500, 700, and 1000...

Microspring™, an additional top layer of SMT™ foam, is added to further enhance patient comfort and reduce friction and shear.

In BodyZone™ 700...

True Suspension, a premium layer of SMT™ protection, helps deliver the lowest peak pressures in the industry.
